

Rahul Mathur

Senior Software Engineer | Backend Engineering & Cloud Architecture | 11+ Years
+91 9731987797 | rahulmathur337@gmail.com | Bengaluru, India | [linkedin.com/in/rahulmathur337](https://www.linkedin.com/in/rahulmathur337)

PROFESSIONAL SUMMARY

Senior Software Engineer with 11+ years designing and shipping high-performance, cloud-native backend systems at Oracle, Ola, and British Telecom. Deep expertise in Java, Spring Boot, microservices, and Kubernetes across AWS, Azure, and OCI. Track record of architecting SaaS platforms that unlock new revenue streams and fintech products serving millions of users. Currently exploring LLM integration and Retrieval-Augmented Generation (RAG) patterns for backend systems. Proven technical leader with hands-on architecture review and engineering mentorship experience.

TECHNICAL SKILLS

Languages	Java (Primary), Python, Golang
Frameworks	Spring Boot, Hibernate, JPA, Dropwizard
Architecture	Microservices, Distributed Systems, Event-Driven, REST APIs, Saga Pattern
Cloud	Oracle Cloud (OCI), AWS (EC2, S3, EKS), Azure
AI / LLM	LLM Fundamentals, Retrieval-Augmented Generation (RAG), Prompt Engineering, Vector Databases
Containers	Kubernetes, Helm, Docker, Mesos
Messaging	Apache Kafka, RabbitMQ
Databases	Oracle DB, MySQL, MongoDB, Couchbase
Caching	Redis, Hazelcast
IaC & DevOps	Terraform, Jenkins, Maven, Git, Sonar
Observability	Prometheus, New Relic, Elasticsearch
Testing	jUnit, Mockito, jMeter

PROFESSIONAL EXPERIENCE

IC3 - Senior Member of Technical Staff

Oracle, OCI

Jan 2023 - Present

- Designed and delivered a SaaS billing platform on Oracle Cloud Infrastructure, enabling 3 new revenue models (fixed, subscription, usage-based) and driving significant annual recurring revenue growth.
- Led microservices development for listing, metering, and billing pipelines processing 150K+ usage events per day, accelerating partner onboarding and contributing to 30% marketplace revenue growth.
- Engineered reusable Kubernetes plug-and-play modules for CI/CD and infrastructure migration, reducing cloud costs by 30% and operational overhead by 40%.
- Architected end-to-end pipelines migrating Oracle Cloud Marketplace to cloud-native architecture, improving system reliability by 30% and cutting MTTR by 50%.
- Led architecture review boards across multiple OCI products; mentored and coached 5 junior engineers.

Tech Stack: Java, Spring Boot, Microservices, Kubernetes, Helm, Python, Terraform, JPA, Oracle Database

Senior Software Engineer

Ola (ANI Technologies Pvt. Ltd)

Sep 2020 - Jan 2023

- ▶ Delivered fintech products end-to-end: Ola Personal Loan, Ola Scooter Financing Platform, and EMI Service, overseeing the full product lifecycle from design through production.
- ▶ Designed event-driven Kafka workflows for asynchronous loan processing, real-time EMI notifications, and financial state machine management.
- ▶ Identified and resolved performance bottlenecks; enhanced system throughput and scalability under high-volume transaction loads.
- ▶ Led and mentored a team of 4 engineers with structured code reviews and technical guidance.

Tech Stack: *Java, Spring Boot, Microservices, Kafka, Kubernetes, Redis, Couchbase*

Senior Software Engineer

British Telecom

Jul 2018 - Sep 2020

- ▶ Built and delivered a network inventory management system to track and visualize UK internet infrastructure in real-time, surfacing inventory data on interactive GeoServer maps.
- ▶ Designed and maintained efficient, reusable Java backend services; resolved critical production defects and identified system bottlenecks.

Tech Stack: *Java, Spring Boot, Microservices, JPA, Multithreading, Hibernate, Oracle DB, GeoServer*

Senior Software Engineer

YASH Technologies

Apr 2017 - Jun 2018

- ▶ Built in-house HR management platform covering timesheets, onboarding, and exit workflows, eliminating a third-party tool and saving \$630K per year in licensing costs.

Tech Stack: *Java, Spring Boot, Microservices, JPA, Multithreading, Hibernate, Oracle DB*

Software Engineer

Accenture

Oct 2014 - Apr 2017

- ▶ Delivered a global order management solution for capturing, validating, and inventorying orders from clients across multiple geographies.
- ▶ Decoupled web application from Oracle WebLogic Server dependency, significantly improving code portability and testability.
- ▶ Automated the Resource Staffing process via an intelligent email-based workflow, reducing manual intervention for bench employee management.

Tech Stack: *Java, Spring Boot, Microservices, JPA, Multithreading, Hibernate, Oracle DB*

A I & L L M E X P O S U R E

LLM Fundamentals & RAG Architecture

- ▶ Working knowledge of Large Language Model (LLM) architecture: transformer models, tokenization, context windows, and prompt engineering techniques.
- ▶ Familiar with Retrieval-Augmented Generation (RAG) pipelines: document chunking, vector embedding, similarity search (FAISS/pgvector), and LLM-augmented response generation.
- ▶ Understanding of integration patterns for embedding LLM APIs (OpenAI, Anthropic) into existing Java/Spring Boot microservice backends.
- ▶ Aware of production concerns: hallucination mitigation, latency tradeoffs, context management, and responsible AI practices.

E D U C A T I O N

Bachelor of Technology (B.Tech)

IEC College, Greater Noida - Uttar Pradesh Technical University

2010 - 2014
